

Supervisory Committee Appointment Form

GENETICS & GENOMICS

It is the responsibility of the graduate student to become informed and to observe all regulations and procedures required by the Genetics & Genomics program. The student must be familiar with those sections of the Graduate Catalog that outline general regulations and requirements, specific degree program requirements, and the offerings and requirements of the major department. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in the Graduate Catalog must be approved by the Dean of the Graduate School. You must have at least 2 committee members with Genetics & Genomics graduate faculty status, including your advisor (chair). You must also have 1 external member. If you wish to have a co-chair, or additional committee members beyond five, please add that information to the form below.
